Welcome to GitHub

You've taken your first step into a larger world, @4lice.

Completed
Set up a personal account

Step 2:
Choose your plan

Step 3:
Go to your dashboard

Choose your personal plan

Plan	Cost <small>(view in EUR)</small>	Private repositories	
Large	\$50/month	50	Choose
Medium	\$22/month	20	Choose
Small	\$12/month	10	Choose
Micro	\$7/month	5	Choose
Free	\$0/month	0	Chosen

Each plan includes:

Unlimited collaborators
Unlimited public repositories

- ✓ Free setup
- ✓ HTTPS Protection
- ✓ Email support
- ✓ Wikis, Issues, Pages, & more

Charges to your account will be made in US Dollars. Converted prices are provided as a convenience and are only an estimate based on current exchange rates. Local prices will change as the exchange rate fluctuates. Don't worry, you can cancel or upgrade at any time.

☐ Help me set up an organization next

Organizations are separate from personal accounts and are best suited for businesses who need to manage permissions for many employees. [Learn more about organizations.](#)

¡Ya tenemos cuenta en GitHub! Ahora tenemos que crear un nuevo repositorio haciendo click donde apunta la flecha roja

Learn Git and GitHub without any code!

Using the Hello World guide, you'll create a repository, start a branch, write comments, and open a pull request.

Let's get started!

 4lice ▾

**Welcome to GitHub! What's next?** (40 seconds ago)

- Create a repository
- Tell us about yourself
- Browse interesting repositories
- Follow [@github](#) on Twitter

Your repositories ⓘ

+ New repository

You don't have any repositories yet.
Create your first repository or learn more about
Git and GitHub.

Subscribe to **your** news feed

ProTip! Edit your feed by updating the users you [follow](#) and repositories you [watch](#).

El nombre del repositorio tiene que tener el formato
“cursoc-<tu_nombre_compuesto>”

Create a new repository

A repository contains all the files for your project, including the revision history.

Owner

Repository name

cursoc-alice

Great repository names are short and memorable. Need inspiration? How about [reimagined-chainsaw](#).

Description (optional)

Public

Anyone can see this repository. You choose who can commit.

Private

You choose who can see and commit to this repository.

☐ Initialize this repository with a README

This will let you immediately clone the repository to your computer. Skip this step if you're importing an existing repository.

Add a README: None

Add a license: None

Create repository

Copiamos la dirección HTTPS de nuestro repositorio

4lice / cursoc-alice

Unwatch 1 Star 0 Fork 0

Code Issues 0 Pull requests 0 Wiki Pulse Graphs Settings

Quickstart — if you've done this kind of thing before

or **HTTPS** SSH `https://github.com/4lice/cursoc-alice.git`

We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

...or create a new repository on the command line

```
echo "# cursoc-alice" >> README.md
git init
git add README.md
git commit -m "first commit"
git remote add origin https://github.com/4lice/cursoc-alice.git
git push -u origin master
```

...or push an existing repository from the command line

```
git remote add origin https://github.com/4lice/cursoc-alice.git
git push -u origin master
```

...or import code from another repository

You can initialize this repository with code from a Subversion, Mercurial, or TFS project.

Import code
